

<p>Heart of Ohio Family Health Center RN Clinical Care Coordinator</p>

Summary: As an RN Clinical Care Coordinator, you will function as a nurse in developing, implementing, and evaluating care plans for patients in need of intensive care management with an emphasis on diabetes and other chronic disease. Coordinating with a care team of providers, nurses, dietitians, pharmacists, behavioral health clinicians, community health workers, and other healthcare professionals, the RN Clinical Care Coordinator will ensure high risk patients receive all of the care that they need. Also, the RN Clinical Care Coordinator will assist with developing plans of care for hospital transition to reduce readmission and improve continuity of care. In addition to Care Coordination responsibilities, the RN Clinical Care Coordinator will be responsible for competency assessment and training of nursing and medical assistant staff and play a significant role in quality improvement initiatives.

Full time Position: Yes

Reports to: Clinical Services Manager

Supervises: No direct supervision responsibilities; however, the expectation is that this role will take a leadership role in contributing nursing expertise to LPNs and MAs.

Dress Requirement: Business Casual

Work Schedule:

Monday through Friday during standard business hours
Times are subject to change due to business necessity

Exempt **Non-Exempt**

Job Duties, these are considered essential to the successful performance of this position:

- Complete nursing assessments and create care plans for patients with complex chronic disease with an emphasis on diabetes.
- Assist organization in implementing substance use disorder programming and coordinating care for patients with substance use disorder.

- Work with the patient, family, and care team to create mutual goals to improve health status.
- Educate patients/family members and use behavior change strategies to improve patient health status.
- Within organizational protocols and nursing scope of practice, assist patients with receiving needed labs, screenings, referrals, other preventative needs, etc.
- Facilitate patient access to internal and external medical and specialty providers.
- Serve as a primary contact, advocate, and educational resource for patients and families.
- Provide home visits to patients in case management cohort.
- Participate in Quality Improvement meetings and initiatives.
- Assist in investigating clinical incidents.
- Other duties as assigned

Job Qualifications (Experience, Knowledge, Skills and Abilities)

Education: Bachelor's degree in nursing.

Experience: 0-2 years clinical care experience. Ambulatory or primary care nursing preferred. Hospital-based nursing acceptable. Ideal candidate has case management experience and experience working with patients with chronic diseases or complex health issues. Candidates must have valid driver's license, reliable transportation, and maintain CPR certification.
